

NCG'S CLIMATE EMERGENCY STATEMENT

NCG recognises the climate emergency and the urgent need to tackle climate change across the UK and beyond.

As an education provider for thousands of young people across the country we recognise our responsibility to educate our students and colleagues about climate change and prepare them with the skills and knowledge necessary to make changes and find solutions for a more sustainable future.

Most importantly, it is vital that we lead by example. That is why we have committed to reducing NCG's carbon footprint by 50% on our gas, electricity and travel related emissions by 2030.

We have developed an environmental strategy that supports this aim and will help us to remove over 4,000 tonnes of CO² from our operations. Our ambition is to become the most sustainable College Group in the UK and to help shape regional initiatives to reduce carbon emissions and our own carbon footprint, wherever we are located.
